04 Outside Bar, Cocktail & Plastic Wine Glasses

The Qualities of Fortessa® Outside™ Plastic Bar & Cocktail Glasses

These plastic glasses are ideal for use around swimming pools, in spas or gymnasia. In fact, anywhere that requires a safety glass.

As you can see from the illustrations EASTMAN TRITAN™ Co-polyester plastic can be cast into elegant shapes with slender stems.

EASTMAN TRITAN™ is a food-grade plastic free of the harmful chemical Bisphenol-a (BPA).

EASTMAN TRITAN™ has other qualities that are ideal in commercial hospitality:

- Shatter resistant plastic
- Brilliant & long-lasting clarity
- Dishwasher resistance
- Can be re-cycled at end of service life

D & V®
DRINKWARE

15oz (.45L)

Juice Hammered
DV.PS.HM.1288
10oz (.3L)

FORTESSA TABLEWARE SOLUTIONS™ ENVIRONMENTAL INITIATIVES

Marketing

- Fortessa Tableware Solutions has replaced paper catalogs with digital marketing material with the effect of eliminating more than 3 million printed pages per year, thereby reducing energy consumption and environmental impact.

Products

- Hygienic and safe for foodservice use
- Provide for thousands of reuses, reducing waste and garbage
- Inherently of lower impact than disposable and low quality products

Manufacturing

- Industry leading innovation for environmental glass production, implemented 2012
- Wholly owned operation in China for quality control and inspection of facilities
- Long-term relationships with ethical and responsible suppliers throughout the world
- Products are free from lead and other heavy metals

Compliance

- Corporate priority on regulatory compliance in all countries of operation
- Extensive work with US Agencies such as FDA, DOT, CBP, and EPA

Transportation

- Consolidation to increase efficiency
- Use of freight rail rather than trucking
- Shipping policies to encourage efficient ordering

Packaging

- Use of recycled materials as practical given market requirements
- Use of environmentally friendly and recyclable materials

Information Technology

- Server virtualization to reduce server hardware requirements by a factor of 10. This reduces energy use by 90% and reduces landfill waste.
- Desktop virtualization to eliminate energy-hungry desktop computers and reduce landfill waste.
- Virtual meeting technology to reduce energy consumption and pollution related to travel.
- Teleworking technology to allow employees to work from home or other offsite locations reduces energy consumption and pollution related to travel and allows Fortessa Tableware Solutions to occupy smaller office locations, reducing total environmental footprint.
- Digital document handling and storage to reduce the need for paper based documents, resulting in reduced energy consumption and smaller environmental footprint.
- Business intelligence software to allow for sophisticated data analysis and storage without paper based reports, resulting in reduced energy consumption and smaller environmental footprint.

Acknowledgments

- Fortessa Tableware Solutions has received the Green Business Certification award from the Loudoun County Chamber of Commerce. One of the first member companies to receive this distinction, the Green Business Certification examines a broad range of criteria for clean operation, reduced carbon footprint and sustainable best practices.
